Detailed Action

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamauchi et al (JPN 10-011956).

3. Regarding Claims 1 and 5, Yamauchi et al shows (Fig. 6) a shock absorber for use in a disc reading device, including a rotation motor, the shock absorber comprising a damper (4) for selectively restraining vibration of the rotation motor and a compression device (7a, 7b) for selectively compressing the damper, wherein as the rotation motor is in a first state, the compression device doesn't compress the damper, and as the rotation motor is in a second state, the compression device compresses the damper [0004].

4. Regarding Claims 2 and 6, Yamauchi et al shows (Fig. 6) the shock absorber, wherein the compression device further comprises a detection circuit (8) and a compression mechanism, and the detection circuit detects state of the rotation motor and selectively controls the compression mechanism to compress the damper [0017].

5. Regarding Claims 3 and 7, Yamauchi et al shows (Fig. 6) the shock absorber, wherein the first state and the second state respectively represent different rotation speed of the rotation motor [0017].

Art Unit: 2653

6. Regarding Claims 4 and 8, Yamauchi et al shows (Fig. 6) the shock absorber, wherein the compression device compresses the damper to increase a natural frequency of the damper [0017].
